

Washing Machine Motor Retractor

Electromechanical retractor unit designed for washing machine applications. Features a synchronous motor, timer mechanism, and electrical connectors.

Product Overview

Professional Grade Motor Retractor

This electromechanical retractor is precision-engineered for the PQD-707P washing machine model. Designed for reliability in demanding household appliance environments, the unit integrates a synchronous motor and a durable timer mechanism. It is available in 110V or 220V configurations and can be supplied with or without wiring to suit specific installation requirements.

Technical Specifications

Wiring Configurations

- With wire
- Without wire

Compatible Model	PQD-707P
Voltage Options	110V, 220V
