

Washing Machine Motor - XD Series

High-performance motor designed for automatic washing machines. It delivers efficient power and torque for optimal washing performance and is suitable for various automatic washing machine models.

Product Overview

XD Series Washing Machine Motor

The XD series motor is a specialized component engineered specifically for high-performance automatic washing machines. Designed with robust construction and durable materials, this motor ensures reliable torque and efficient power delivery for optimal laundry cycles. It is built for seamless integration into various automatic models, prioritizing ease of installation and long-term operational consistency for demanding appliance environments.

Technical Specifications

Primary Application	Automatic Washing Machine
Series Name	XD Series
Compatibility	Automatic Washing Machine
