

Washing Machine Motor XD Series

This XD series motor is designed for automatic washing machines. It features robust construction and efficient operation for demanding laundry appliance applications.

Product Overview

XD Series Motor for Automatic Washing Machines

The XD series motor is a high-performance solution specifically engineered for automatic washing machine applications. Featuring robust construction and precision-machined components, it is designed to deliver consistent, reliable operation in demanding laundry environments. Optimized cooling capabilities ensure a prolonged service life, making it a dependable choice for various automatic washing machine models.

Technical Specifications

Design Focus

Reliability • Durability • Extended Lifespan

Primary Application

Automatic Washing Machine

Key Features

Robust Construction, High-Performance, Precision-Machined, Optimized Cooling
