

Washing Machine P Shaft

This P shaft is designed for washing machines to facilitate rotational force transmission. It is manufactured for durability, ensuring compatibility and optimal performance within the machine's mechanism.

Product Overview

Professional Grade Washing Machine P Shaft

The WJ-222-A is a precision-engineered P shaft component specifically designed for washing machine drive systems. It is essential for facilitating the transmission of rotational force, ensuring reliable agitation and spinning cycles. Built for durability and consistent performance, this component is designed for easy installation, making it an ideal choice for maintenance and repair professionals.

Technical Specifications

Model Number	WJ-222-A
Component Type	P Shaft
Primary Application	Washing Machine Drive System, Agitation Mechanism, Spinning Mechanism

Performance Features

Key Benefits

- Robust construction for enhanced durability
- Engineered for wear resistance under typical operating loads
- Precise manufacturing for optimal compatibility
- Designed for simplified installation and replacement
