

Washing Machine P Shaft

This washing machine P shaft is a component used in washing machines. It is a crucial part for the proper functioning of the washing machine's mechanical system, facilitating the washing process.

Product Overview

Precision Engineered Component

The Washing Machine P shaft WJ-228-E(12) is a specialized mechanical component essential for the optimal operation of washing and drying machinery. Designed for household electrical appliances, this shaft ensures smooth mechanical movement, facilitating an efficient washing process. It is compatible with a wide range of washing machine models, making it a reliable solution for maintenance and repair requirements.

Technical Specifications

Model Number	WJ-228-E
Shaft Diameter	12 mm
Application Area	Washing Machinery, Drying Machinery, Household Appliances
Function	Mechanical system drive and transmission
