

Washing Machine P Shaft

The WJ-222-B P shaft is a component designed for use in washing machines. It facilitates the transfer of rotational motion within the appliance, contributing to the washing or spinning action.

Product Overview

High-Performance Washing Machine P-Shaft

The WJ-222-B P-shaft is a high-quality component engineered for seamless rotational motion transfer in professional washing machines. Designed with robust materials, it ensures reliable power transmission and longevity within the appliance's mechanical system. This part offers excellent resistance to wear and corrosion, making it an essential replacement for maintaining efficient washing and spinning cycles.

Technical Specifications

Model Identifier	WJ-222-B
Primary Function	Rotational motion transmission
Durability Features	Wear-resistant, Corrosion-resistant, Robust construction

Application

Compatibility

- Standard Washing Machines
- Spin-dryer systems
