

Washing Machine Speed Reducer

This speed reducer is designed for use in washing machines. It converts the motor's high-speed rotation into a lower speed with higher torque, which is required for the washing machine's agitation or spinning cycles.

Product Overview

High-Efficiency Speed Reducer for Industrial Laundry Systems

The WJ-001-AX-25 is a robust speed reducer engineered specifically for the demanding requirements of commercial and residential washing machines. It effectively converts high-speed motor output into the precise torque necessary for optimized agitation and spin cycles. Designed for durability and consistent power transmission, this component ensures long-term operational reliability in drive systems.

Technical Details

Model Number	WJ-001-AX-25
Construction Features	Blue Housing, White Pulley System, Durable Housing
Primary Application	Washing machine drive systems
