

Washing Machine Speed Reducer

This washing machine speed reducer converts the motor's high-speed rotation to the lower speed required for washing and spinning cycles. Its compact design allows easy integration into various washing machine models, optimizing power transfer and reducing energy consumption.

Product Overview

High-Efficiency Speed Reducer

The JN-001-AX-35-30-BLUE washing machine speed reducer is designed for high-performance power conversion, efficiently shifting motor input to the precise speeds required for laundry cycles. Its robust construction ensures long-lasting reliability, while the compact design allows for seamless integration into various washing machine configurations. Engineered for smooth and quiet operation, this component optimizes energy usage through effective power transfer.

Technical Specifications

Model Identifier	JN-001-AX-35-30-BLUE
Housing Material	Durable reinforced plastic
Key Features	Precision-Engineered Gears, Compact Design, Quiet Operation, Integrated Belt Pulley
