

Washing Machine Speed Reducer

This washing machine speed reducer efficiently transfers power from the motor to the agitator or drum. It reduces the motor's high-speed rotation to a lower speed suitable for washing and spinning cycles.

Product Overview

Washing Machine Speed Reducer WJ-002-B

The WJ-002-B speed reducer is a critical component designed to manage power transfer from the motor to the washing machine drum or agitator. It effectively converts high-speed motor rotation into the precise, manageable speeds required for optimal washing and spinning performance. Built with durable materials, this reducer is engineered to enhance machine longevity by minimizing mechanical wear and tear.

Technical Specifications

Compatibility

- Various washing machine models
- Replacement compatible
- Upgrade compatible

Model Number	WJ-002-B
Core Functions	Power Transfer, Speed Reduction, Agitator Control, Drum Rotation

Performance Metrics

Durability Rating

Robust Design • Wear Resistant • High Performance
