Product Overview

High-Efficiency Spin Motor

This 70W spin motor is engineered for reliable performance in twin tub washing machines. Featuring a robust metal housing and a durable shaft, it is designed for seamless integration and long-lasting operation in household appliances. The unit provides consistent rotational power with a speed of 1700 RPM, ensuring efficient performance for your laundry equipment.

Technical Specifications

Electrical Characteristics

230 V

Voltage

50 Hz

Frequency

0.8 A

Rated Current

Mechanical Details

Feature	Specification
Poles	4P
Insulation Class	Class B
Rotation	CCW
Capacitor	5 μ F/440V
Rated Power	70 W
Speed	1700 RPM

Application & Features

Wiring Color Codes

- Red
- Black
- Blue

Key Features

Robust Metal Housing, Durable Shaft, High-Efficiency, Compact Design
