

Washing Machine Spin Motor

This electric motor is designed for spinning action in home appliances such as washing machines. It features durable construction and efficient energy consumption.

Product Overview

High-Performance Spin Motor

This T series spin motor is engineered for reliable rotational power in washing machines and various home appliances. Featuring a precision-balanced rotor and high-quality windings, it ensures smooth operation and long-term durability. Its metallic housing provides enhanced protection, making it a robust choice for equipment requiring consistent performance and energy efficiency.

Technical Specifications

Target Applications

- Washing Machines
- Industrial Machinery
- Home Appliances

Core Metrics

1 High
Efficiency

Series	T Series
Construction Features	Metallic Housing, Precision-Balanced Rotor, Compact Design
