

Washing Machine Water Pressure Switch

This water pressure switch is designed for use in washing machines. It monitors and regulates the water pressure inside the washing machine, ensuring optimal water levels and preventing overflow.

Product Overview

Reliable Water Level Control

This water level pressure switch is engineered to provide precise monitoring and regulation of water levels within washing machines. Designed for secure hose connections, the unit helps ensure optimal filling while effectively preventing overflows. It is an essential spare part for maintaining the safe and efficient operation of laundry appliances.

Technical Specifications

Marking Details

- SL-Decals
- NO.11211211006
- 30-01045.26
- 2014.11.26

Model Number	11000298
Component Type	Water level pressure switch
Compatibility	Ningbo Jide
