Product Overview

Professional Wastewater Lifting Solution

This high-performance wastewater lifting station is engineered to provide reliable drainage in environments where gravity flow is not possible. With a powerful 700W motor, it efficiently manages waste from multiple fixtures including toilets, showers, and washing machines. Its compact and durable design ensures easy installation in both residential and commercial settings, making it an ideal choice for basement or below-level drainage solutions.

Performance Metrics

Performance Capabilities

7.8 m³/h

Maximum Flow

9 m

Max Vertical Lift

90 m

Max Horizontal Transmission

Technical Specifications

Electrical Data

Parameter	Value
Rated Voltage	220V
Frequency	50Hz
Rated Power	700W

Compatible Fixtures	Toilet, Wash basin, Shower room, Bathtub, Washing machine
Inlet Configuration	WC + 3
