

Water Circulation Pump with Thermal Protection

This water circulation pump is designed for efficient and reliable fluid transfer. It features thermal protection for single-phase operation and is suitable for HVAC, industrial cooling, and general water circulation needs.

Product Overview

Reliable Water Circulation

This water circulation pump is designed for efficient fluid transfer in both domestic and civil applications. It is suitable for use with clean water and non-aggressive liquids, making it perfect for irrigation, pressure sets, and general water distribution. Built with a robust cast iron housing and stainless steel components, it ensures long-term durability and consistent performance.

Technical Specifications

Common Applications

- Domestic water distribution
- Pressure sets
- Garden irrigation
- HVAC systems
- Industrial cooling

Fluid Compatibility

Clean water, Non-aggressive liquids

Construction & Design

Corrosion Resistance

Stainless steel flanges • Internal lining

Pump Housing Material

Cast iron (blue-painted)

Installation Requirements

Installation Environment

Enclosed or sheltered from inclement weather
