Overview

Heavy-Duty Cargo Utility

The XF150ZH-D is a robust three-wheeled cargo tricycle engineered for heavy-duty material transport and demanding utility applications. Featuring a forced water-cooled engine, this vehicle ensures consistent performance and durability during sustained operation. With a high load-bearing capacity and a hydraulic lift mechanism, it provides an efficient solution for logistics and cargo management in various industrial settings.

Engine & Performance

Maximum Speed

70 km/h

Max Speed

Engine Details

- 1-cylinder 4-stroke
- Forced water cooled
- 149ml Displacement
- CDI Ignition

Power & Torque

9 kW

Max Power

9.6 N.m

Max Torque

Dimensions & Capacity

Weight Capacity

415 kg

Net Weight

500 kg

Max Load

Overall Dimensions (L*W*H)

3550*2050*1640 mm

Chassis & Components

Tire Specifications

5.00-12 (Front and Rear)

Braking System

Front Drum, Rear Oil Brake

Operating Efficiency

Economic Fuel Consumption

4.2 L/100Km
