

Water Cooled Screw Chiller

This water cooled screw chiller is designed for industrial and commercial cooling applications. It utilizes a screw compressor to ensure reliable and energy-efficient operation.

Product Overview

Industrial Cooling Performance

This water-cooled screw chiller offers a powerful 1600KW cooling capacity, specifically engineered for large-scale industrial and commercial applications. By utilizing high-efficiency R134a refrigerant and a sophisticated closed shell and tube heat exchanger, the unit ensures stable temperature management and energy-efficient operation. Its robust construction makes it a reliable solution for complex HVAC and process cooling requirements.

Capacity

Technical Specifications

Refrigerant	R134a
Compressor Type	Screw Compressor
Condenser Type	Closed shell and tube

Features

System Capabilities	Cooling, Heating, Efficient Heat Exchange
