

Water-Cooled Silent Diesel Generator

This water-cooled generator set features a silent enclosure. It is designed for low noise operation and is applicable in high-temperature environments.

Overview

High-Performance Silent Power Generation

This water-cooled silent diesel generator is engineered for reliable power supply in demanding environments. Featuring a robust two-cylinder, four-stroke engine, it ensures high transmission efficiency through a rigid taper shaft connection. The unit is designed for durability and effective heat dissipation, making it suitable for backup power, construction sites, and off-grid applications.

Engine Specifications

Engine Model	KM2V80
Cooling System	Water-cooled
Engine Type	Two-cylinder, V-twins, Four-stroke

Performance Metrics

Rated Output Power

8.5 kW

Rated Output

9.5 kW

Max Output

Rated Voltage	230 V
Rated Frequency	50 Hz
Rotation Speed	3000 rpm
Fuel Capacity	26 L

Design & Construction

Noise Reduction Features

- Sound absorption cotton lining
- Special bipolar muffler
- Soundproof enclosure

Output Configuration

Flexible panel with multiple socket options
