

Water Dispenser Replacement Taps

Replacement taps designed for standard water dispensers. These taps feature color-coded push buttons and levers for dispensing both hot and cold water.

Product Overview

Professional Grade Replacement Taps

These replacement taps are essential components for maintaining the functionality of standard water dispensers. Engineered for durability and ease of use, these parts feature color-coded controls to distinguish between hot and cold water flows. Designed for simple installation, they provide a reliable solution for restoring your water dispenser to full working order.
