

Water Dispenser Resin Filter

This resin filter is designed for water dispensers to improve water quality by reducing hardness and removing certain minerals. The filter features a transparent blue housing, allowing visual inspection of the resin level.

Product Overview

High-Performance Water Filtration

This resin-based water dispenser filter is engineered to significantly improve water quality by effectively reducing hardness and filtering out unwanted minerals. Featuring a durable, transparent blue housing, it allows for easy visual inspection of the resin levels, ensuring you know exactly when a replacement is needed. Designed for seamless integration, this filter offers a straightforward installation process, making it an ideal maintenance solution for professional water dispensing systems.

Technical Specifications

Filter Media Type	Resin
Housing Construction	Transparent Blue Polymer
Primary Functions	Water Softening, Mineral Reduction, Hardness Removal

Maintenance

Replacement Status	Periodic Replacement Required
Installation	Easy installation and removal design
