

Water Fire Extinguisher for Class A Fires

This fire extinguisher is designed for extinguishing Class A fires involving solid combustibles. It features a durable steel cylinder, pressure gauge, and directional discharge nozzle.

Product Overview

Professional Fire Safety Solution

This portable water-based fire extinguisher is specifically engineered to handle Class A fires involving solid combustibles, including wood, paper, and textiles. Designed for reliability and ease of use, it features a robust green-painted steel cylinder and a manual pressure monitoring gauge. It provides an effective, dependable fire safety solution suitable for a wide range of industrial and commercial environments.
