

Water Jet Pump for Irrigation and Pressure Boosting

This jet pump is engineered for efficient water transfer and pressure boosting. It features a robust motor and durable construction suitable for irrigation, domestic water supply, and industrial use.

Overview

High-Performance Water Jet Pump

This water jet pump is designed for efficient water transfer and reliable pressure boosting. With a robust 1.5HP motor, it is engineered for optimal hydraulic performance, making it suitable for irrigation, domestic water supply, and various industrial processes. Its durable construction ensures long-lasting operation and ease of installation for professional applications.

Technical Specifications

Input Power

1100 W
Input Power

1.5 HP
Horsepower

Operating Voltage

220-240V~50Hz

Performance Metrics

Maximum Head

60 M

Maximum Flow Rate

70 L/min

Applications

Suitable Applications

Irrigation, Domestic Water Supply, Industrial Processes, Pressure Boosting
