

Water Pressure Booster Pump

This water pressure booster pump is designed for efficient water boosting and distribution. It delivers consistent water pressure for various household needs such as showering and gardening.

Overview

Efficient Water Boosting Solution

The SX-130W water pump is designed for reliable water boosting and distribution in residential and light commercial environments. It features a robust, compact construction that allows for easy installation even in confined spaces, while its quiet operation ensures minimal disruption to your daily activities. Equipped with an automatic pressure switch, the unit maintains consistent water pressure for appliances, showers, and gardening needs.
