

Water Pressure Booster Pump

This automatic water pressure booster pump is designed to automatically increase water pressure for residential and light commercial applications. It features a durable construction, efficient motor, and automatic on/off operation based on water demand.

Product Overview

High-Efficiency Water Pressure Solution

This automatic water pressure booster pump is engineered to provide reliable and consistent pressure for residential and light commercial water systems. Designed to sense water demand, it features an intelligent automatic on/off operation to ensure convenience and energy efficiency. The inclusion of a pressure tank reduces frequent cycling, extending the lifespan of the motor while maintaining steady flow for showers and various water fixtures.

Technical Features

Control System

Automatic On/Off • Pressure Sensing

Construction

Durable Construction, Integrated Pressure Tank

Application Scope

Suitable Applications

- Residential water boosting
- Light commercial plumbing
- Shower pressure improvement
- Faucet and fixture supply
