Overview

Professional Performance Overview

The DP-370A water pump is a robust and efficient solution engineered for versatile water transfer and boosting applications. Featuring a heavy-duty cast iron body and professional-grade components like a brass foot valve and integrated pressure controls, it offers exceptional reliability in residential, commercial, and industrial settings. Its corrosion-resistant construction and enclosed motor ensure longevity and consistent performance under demanding conditions.

Technical Specifications

Model Number	DP-370A
Housing Material	Cast Iron
Key Components	Copper Pipe, Brass T-connector, Brass Foot Valve, Strainer

Operational Controls

Performance Monitoring

1 Included

Integrated Pressure Gauge

1 Included

Automated Pressure Switch

Applications

Typical Applications

- Residential water supply
- Commercial boosting systems
- Industrial water transfer
