

Water Pump for Drainage and Irrigation

This water pump is designed for a variety of applications, featuring a durable motor and efficient pumping mechanism. Its compact design allows for flexible installation, making it suitable for both drainage and irrigation purposes.

Product Overview

Professional Water Management Solution

This robust water pump is engineered for versatility, serving as an efficient solution for both drainage and irrigation applications. Its durable motor and sturdy construction ensure long-lasting performance in demanding environments. The compact design facilitates easy installation, allowing it to integrate seamlessly into a wide variety of existing plumbing systems.

Technical Features

Installation Features

- Compact form factor
- Simplified inlet port connection
- Simplified outlet port connection

Primary Applications

Drainage, Irrigation
