

# Water Pump for Drainage and Irrigation

This water pump is designed for various applications, including drainage and irrigation. Engineered for reliable performance, it ensures efficient water transfer.

## Overview

### Professional Water Management

This robust water pump is engineered for high-efficiency water transfer in both drainage and irrigation applications. Its compact and durable design ensures reliable performance in demanding environments. Designed for professional use, this unit provides the durability necessary for consistent operation across various agricultural and industrial tasks.

## Technical Specifications

### Construction Quality

- Robust durable construction
- Compact form factor
- Protective blue finish

### Power Type

Electric

### Primary Applications

Drainage, Irrigation
