

Water Pump for Irrigation and Drainage

This water pump is designed for efficient drainage and irrigation purposes. Its robust engine and durable construction make it suitable for agricultural and industrial applications requiring reliable water transfer.

Overview

Professional Irrigation and Drainage Solution

This high-performance water pump is designed to handle demanding irrigation and drainage tasks with reliability. Featuring a compact 1.5-inch diameter inlet and outlet, it delivers a rated flow of 21 cubic meters per hour. Its robust construction and 3600 RPM engine make it an ideal choice for agricultural and industrial water transfer applications.
