

Water Pump for Irrigation and Drainage

This water pump is a robust and efficient solution for drainage and irrigation needs. Featuring a durable engine and high-capacity pump, this unit is designed for reliable performance in demanding agricultural and industrial applications.

Overview

Reliable Water Management Solution

The DS30 water pump is a robust and efficient solution engineered for both drainage and irrigation requirements. Featuring a durable engine and a high-capacity pump, this unit is built to deliver consistent performance in demanding agricultural and industrial environments. Its sturdy frame ensures both protection and portability, making it an ideal choice for rapid water transfer and general water management tasks.

Key Features

Suitable Applications

Irrigation, Dewatering, Water Management
