

Water Pump for Irrigation and Drainage

This water pump is a robust and reliable solution for agricultural drainage and irrigation needs. It delivers high-volume water transfer for various applications and its durable construction ensures long-lasting performance in demanding environments.

Overview

High-Performance Water Pump

This robust water pump is engineered for reliable performance in agricultural drainage and irrigation applications. Featuring a powerful engine, it is designed to facilitate high-volume water transfer efficiently. The durable construction ensures longevity and consistent operation, making it an ideal choice for demanding environments and various water management tasks.

Technical Specifications

Performance Highlights

20 DS

Model Series

Construction

Durable Construction • High-Volume Capacity

Primary Applications

Agricultural Irrigation, Dewatering, Water Transfer
