

Water Pump for Irrigation and Water Transfer

This water pump is designed for irrigation, drainage, and general water transfer needs. It is built for high flow rates and efficient operation, suitable for agricultural, construction, and domestic applications.

Product Overview

High-Performance Water Transfer Solution

This robust water pump is engineered for demanding irrigation, drainage, and general water transfer tasks. Built with durable materials, it offers reliable performance for agricultural, construction, and domestic applications. Its compact design and sturdy frame ensure both portability and stability during operation, while standard fittings allow for quick and easy connection to existing hoses and pipes.

Engine Performance

Engine Power

6.5 HP

Engine Horsepower

Application & Usage

Primary Applications

Irrigation, Drainage, Water Transfer, Agricultural, Construction, Domestic

Design & Features

Key Features

- Robust and durable construction
- High flow rate efficiency
- Compact and portable design
- Sturdy frame for stability
- Standard fittings for easy setup
