

# Water Pump Pressure Switch

This pressure switch automatically controls a water pump based on the pressure within the system. It is equipped with adjustable pressure settings, ensuring optimal performance and protection against over-pressure or low-pressure conditions.

## ADDITIONAL IMAGES

## Product Overview

### Professional Water Pump Pressure Switch

This adjustable pressure switch is engineered for reliable, automatic control of water pump systems across residential, commercial, and industrial applications. It features a precision-adjustable mechanism that monitors pipe pressure, automatically toggling the power supply to ensure consistent water flow and prevent pump damage. Available in various configurations including transparent, sealed, and high-power variants, this durable device is built for long-term operational performance.

## Technical Specifications

### Electrical Performance

**250 V**

Max Voltage

**15 A**

Max Current

**0.75 HP**

Max Power (220V)

### Protection Rating

IP44 (Seal type)

### Available Models

SK-3A, SK-3B, SK-3D, SK-3AC

### Standard Preset

20-40 PSI

## Design Features

### Key Features

- Transparent cover for visual contact inspection
- Independent adjusting screw for pressure control
- Long-life silver alloy contact terminals
- Special cable connector for severe environments
- Robust hexagonal base for secure mounting
