Integrated Pump Control Solution

This pressure switch assembly is engineered for booster sets, combining an automatic control switch with an integrated pressure gauge and a robust three-way fitting. The design facilitates fast and easy connection to both pumps and pressure tanks, streamlining the setup process. Featuring a durable reinforced construction, it serves as an efficient and reliable replacement for traditional brass fittings in domestic and industrial water systems.

Technical Specifications

Connection Ports

- Female 1 inch
- Female 1 inch
- Male 1 inch

Material Composition

Robust Plastic, Reinforced Steel Ring

Model Identifier

PM5-3W

Application Data

Ideal Applications

Booster Sets, Domestic Water Systems, Irrigation, Industrial Pumping
