

Water Pump Pressure Switch

This pressure switch is designed for use with water pumps. It monitors the pressure of the water system and automatically turns the pump on or off to maintain the desired pressure range.

Product Overview

Reliable Water Pump Control

This pressure switch is a durable and compact solution designed to automate water pump operations. It effectively monitors system pressure, automatically toggling the pump on or off to maintain a consistent pressure range. Featuring a clear housing for simple maintenance checks and a robust threaded connection, it is engineered for dependable performance in diverse water management applications.
