

Water Pump Set with Diesel Engine

This water pump set is engineered for efficient water transfer in demanding environments. Featuring a durable diesel engine and protective frame, it is ideal for irrigation, drainage, and general water pumping applications.

Overview

Robust Diesel Water Pump Series

This series of diesel-powered water pumps is engineered for reliable performance in agricultural, construction, and emergency water supply applications. Featuring air-cooled diesel engines and self-priming pump technology, these units are designed for efficient water transfer and drainage. The compact, frame-mounted design ensures durability and portability, making them suitable for demanding environments where consistent water movement is required.

Performance Specifications

Model Specifications

Model	Suction/Discharge (mm)	Head (m)	Capacity (m ³ /h)	Output (kW)
JC-50CBZ15-2.8B	50/50	15	22	2.8
JC-80CBZ15-3.5B	80/80	15	40	3.5
JC-80CBZ15-3.7B	80/80	15	40	3.7
JC-80CBZ15-4.0B(E)	80/80	15	40	4

Engine Details

Cooling System	Air cooling
Combustion Chamber	Direct injection
Rotation Direction	Counterclockwise (from flywheel end)
Starting System	Recoil hand, Electric start
Rated Speed	3600 r/min

Physical Characteristics

Dry Weight Range

38 kg

Minimum Weight

46 kg

Maximum Weight
