

Water Pump System for Irrigation

This water pump system is designed for efficient drainage and irrigation in agricultural settings. It includes a pressure tank, a pump motor, and various pipe fittings to move water effectively.

Product Overview

High-Efficiency Irrigation Pump System

This professional-grade water pump system is engineered for reliable drainage and irrigation in agricultural settings. The integrated setup features a durable pressure tank and a robust pump motor, designed to maintain consistent water pressure and flow. Built with high-quality brass and resilient plastic fittings, it offers a dependable solution for managing water distribution across farming operations.

Technical Specifications

Key Components

- Pressure Tank
- Pump Motor
- Brass Pipe Fittings
- Black Plastic Pipe Fittings

Component Colors

Component	Color
Pressure Tank	Orange
Pump Motor	Dark Blue

Primary Application

Agricultural Irrigation, Water Drainage
