Overview

Professional Water Boosting Solution

The PS-138 water pump is a robust and efficient system engineered for reliable water boosting and circulation. Featuring durable construction with a cast iron body and a corrosion-resistant impeller, this pump is ideal for residential, commercial, and light industrial applications. It includes an integrated pressure switch and tank to ensure consistent water flow and energy-efficient operation.

Technical Specifications

Operational Metrics

138 PS

Model Series

Primary Applications

- Residential water boosting
- Garden and irrigation systems
- Small scale light industrial use
- Commercial water circulation

Key Features

Thermal Overload Protection, Corrosion-Resistant Impeller, Automatic Pressure Switch, Cast Iron Pump Body

Protection and Accessories

Environmental Protection

The included white, durable plastic cover is designed to shield the pump from environmental elements and potential physical impact. With a compact, rectangular design featuring rounded edges and precise cutouts for hose access, it ensures extended longevity for the pump unit in both indoor and outdoor settings.
