

# Water Purification Pitcher

This water purification pitcher features a clear plastic exterior and a white interior reservoir with marked volume levels. It includes a white lid and ergonomic handle for easy pouring.

## Product Overview

### High-Efficiency Water Purification

This water purification pitcher is designed for domestic use, combining a compact 2.5L total capacity with an ergonomic design for daily hydration needs. Utilizing a sophisticated carbon and resin filter cartridge, it effectively treats water to ensure clean, refreshing output. The durable construction features high-quality materials including AS plastic for the pitcher body and ABS for the lid, ensuring a long-lasting and reliable kitchen accessory.
