

Water Transfer Centrifugal Pump

This centrifugal pump is designed for efficient water transfer and boosting. It features a durable construction for long-lasting operation and reliable performance in various applications.

Product Overview

High-Performance Centrifugal Pump

This centrifugal pump is designed for efficient water transfer and boosting applications. It features a robust copper wire motor and copper impeller for reliable, long-lasting operation. Suitable for domestic water supply, irrigation, and various industrial processes, this unit delivers consistent performance with a maximum flow rate of 110 liters per minute.

Technical Specifications

Rated Power	750 W
Horsepower	1 HP
Rated Voltage	220-240V
Frequency	50 Hz

Performance Metrics

Key Performance Metrics

32 m Max Head	110 L/min Max Flow	8 m Max Suction
-------------------------	------------------------------	---------------------------

Construction & Design

Key Materials	Copper wire motor, Copper impeller
Pipe Diameter	1" x 1"
Cable Length	0.3 m

Packaging

Packaging	Color box
-----------	-----------
