

Water Transfer Centrifugal Pump

This centrifugal pump is designed for efficient water transfer and pressure boosting. It features a robust construction for durability and long-lasting operation.

Overview

High-Performance Water Transfer

This high-performance centrifugal pump is engineered for efficient water transfer and reliable pressure boosting. Designed with robust construction, it ensures durability and long-lasting operation in demanding environments. It is an ideal solution for a variety of applications, including agricultural irrigation, domestic water supply systems, and essential industrial processes, delivering optimal hydraulic performance and energy efficiency.

Technical Specifications

Key Performance Features

- High-efficiency hydraulic design
- Robust construction for durability
- Energy-efficient operation

Model Number	JSW/10M
Suitable Applications	Irrigation, Domestic Water Supply, Industrial Processes, Pressure Boosting
