

Water Transfer Pulley Pump

This pulley pump provides a versatile and efficient water transfer solution for various applications. Its robust construction and reliable performance make it ideal for irrigation, drainage, and general water pumping needs.

Product Overview

Professional Water Transfer Solution

The Water Transfer Pulley Pump is a high-performance solution designed for reliable water management in agricultural, industrial, and municipal environments. Featuring a heavy-duty frame and an advanced combustion chamber, it delivers exceptional fuel efficiency with consistent, smooth operation. With options for durable aluminum alloy or high-lift cast-iron bodies, this pump is engineered for long service life even in demanding conditions.

Technical Specifications

Key Features

- Easy and fast starting
- Low vibration operation
- Low running temperature
- High quality ceramic mechanical sealing

Performance Metrics

3500 RPM

Rated Speed

Pump Body Material

Aluminum Alloy, Cast-Iron

Application Scope

Primary Applications

- Agricultural irrigation (plains, hills, mountains, orchards)
- Construction plant operations
- Mine water pumping
- Municipal drainage
