

Water Transfer Pump

This water transfer pump is engineered for efficient water movement, making it suitable for irrigation and dewatering. It features a durable construction for long-lasting performance in demanding environments.

Overview

NS-50 Water Transfer Pump

The NS-50 is a robust and reliable water transfer pump engineered for efficient water movement in demanding environments. Designed with a balance of power and portability, it is an ideal solution for irrigation, dewatering, and general water transfer tasks. Its compact design ensures convenient storage and transport while maintaining high performance standards.

Performance

Primary Applications

- Irrigation
- Dewatering
- General water transfer

Key Capabilities

Self-priming, High flow rate, Durable construction

Design

Portability

Compact Design
