Overview

High-Performance Water Transfer

This water pump is engineered for efficient water transfer and reliable operation across agriculture, construction, and emergency water supply applications. It features a robust four-stroke gasoline engine designed for optimal fuel efficiency and consistent power delivery. The unit is housed in a corrosion-resistant material and secured within a protective frame, ensuring durability and easy portability for professional site use.

Technical Specifications

Model Identification	WP40X
Engine Type	Four-stroke gasoline engine
Key Operational Features	Self-priming, Corrosion-resistant housing, Protective frame, Portable

Applications

Suitable Applications

- Agricultural irrigation
- Construction site water management
- Emergency water removal
- Professional site supply
