

Water Transfer Pump

This water transfer pump is designed for efficient water transfer in various applications. It delivers a high flow rate and strong suction capability, making it suitable for irrigation, construction, and emergency water removal.

Overview

High-Performance Water Transfer

This high-performance water pump is engineered for efficient fluid management across diverse professional applications. Equipped with a robust engine, it provides reliable power and substantial suction capabilities to maintain consistent high flow rates. Built with durable materials, the unit is designed to withstand demanding environmental conditions, making it an ideal choice for irrigation, construction sites, and emergency water removal.

Technical Specifications

Key Performance Metrics

80 mm

Inlet Diameter

Model Identification

CGZ80-32-12

Applications

Suitable Applications

Irrigation, Construction, Emergency Water Removal

Features

Regional Recognition

Proven in South East Asia
