

Water Transfer Pump for Agriculture and Irrigation

This pump is designed for efficient water transfer in agricultural and irrigation applications. It features a robust construction with a protective frame, ensuring durability in demanding environments.

Product Overview

High-Efficiency Water Transfer

This water transfer pump is specifically engineered for demanding agricultural and irrigation applications. It features a high-efficiency design powered by a reliable engine to ensure consistent performance for various water movement tasks. The construction includes an extremely sturdy protective frame and durable components like a cast iron impeller, making it suitable for long-term use in rugged environments.

Technical Specifications

Construction Materials

- Cast iron impeller
- Cast iron turbine cover
- Sturdy protective frame

Key Design Features

- Latest high-efficiency pump design
- Powerful engine
- Heavy-duty protective framework

Integrated Safety Systems

Oil warning system
