

Water Transfer Pump for Irrigation and Drainage

High-performance water pump designed for efficient water transfer in agricultural and industrial applications. Features a robust engine for reliable operation and a durable pump housing for long-lasting performance.

Overview

High-Performance Water Transfer Solution

This industrial-grade water transfer pump is engineered to provide reliable and efficient liquid movement for demanding agricultural and construction environments. Featuring a robust internal combustion engine, it offers consistent power for high-volume irrigation and drainage tasks. Its durable pump housing ensures longevity and sustained performance even in challenging operational settings.

Performance

Key Operational Metrics

6.5 HP

Engine Power

Engine Specification

I/C 6.5 HP

Application

Suitable Applications

Agriculture, Irrigation, Industrial Drainage, General Water Transfer

Construction

Build Quality

Robust Engine • Durable Housing • High-Performance Design
