

# Water Wash Air Purifying Humidifier

This innovative device combines air purification and humidification using a water-wash system. The system improves air quality by removing dust and pollutants while increasing humidity.

## ADDITIONAL IMAGES

## Overview

### Dual-Action Air Quality Solution

This water-wash air purifying humidifier offers a professional-grade approach to indoor air quality management. By combining advanced evaporation technology with a copper strip sterilization method, the device effectively removes dust and pollutants while maintaining optimal humidity levels. Designed for efficiency, its 3D mesh water absorption system ensures whisper-quiet operation suitable for office or residential environments.

## Performance Metrics

### Key Performance Metrics

**240 ml/h**

Max Mist Output

**33 dB**

Low Noise Level

**1.5 L**

Tank Capacity

## Technical Specifications

Electrical Requirements	100-240V / 50-60Hz
Power Consumption	5 W
Humidification Method	Evaporation, 3D Mesh Water Absorption
Sterilization Method	Copper strip

## Design & Physical Properties

### Weight

Metric	Weight
Gross Weight	2.5
Net Weight	4

### Product Dimensions

305 x 330 x 175 mm

## Operational Features

### Settings

- Low (33dB)
- High (43dB)

### Status Lights

- Blue LED: High setting
- Orange LED: Low setting
