Product Overview

Professional Water Well Filtration Screen

Engineered for high-efficiency water extraction, these well screens feature a V-shaped profile wire spirally wound around longitudinal support rods. Each intersection is fusion-welded for superior structural integrity and durability. The design allows for precise slot spacing, ensuring optimal flow while effectively managing filtration requirements in demanding well environments.

Technical Specifications

End Connections

Plain Beveled Ends • Threaded

Slot Size Range 0.10mm to 6mm

Maximum Open Area 37 %

Maximum Length 6 meters

Materials and Construction

Available Diameters

- 1.5 inch
- 2 inch
- 3 inch
- 4 inch
- 6 inch
- 8 inch
- 10 inch
- 12 inch
- 14 inch
- 16 inch
- 18 inch

Available Materials

Stainless Steel 304, Low Carbon Steel, Low Carbon Galvanized Steel, Plastic Sprayed Steel
