

Waterproof Aluminum Oxide Sandpaper

This sandpaper utilizes a resin bond and aluminum oxide abrasive for effective material removal. It is designed for wet or dry sanding on surfaces such as automobiles, furniture, and appliances, providing a bright surface finish with minimal dust.

Overview

High-Performance Waterproof Sandpaper

This resin-bonded aluminum oxide sandpaper is engineered for superior performance in both wet and dry sanding applications. Designed to minimize dust pollution, it ensures a clean working environment and a bright, consistent surface finish. It is an ideal solution for professionals working with automotive parts, furniture, leather goods, and mechanical components.
