Product Overview

Rugged Illumination for Demanding Environments

This LED Tri-proof light is engineered for environments where durability is paramount, providing exceptional resistance against water, dust, and corrosion. With a robust extruded polycarbonate housing and advanced sealing technology, it ensures reliable performance in harsh industrial and commercial settings. Designed for efficiency and ease of installation, this lighting solution offers uniform illumination for spaces like parking garages and warehouses.

Technical Construction

Housing Material	Extruded Polycarbonate
Gear Tray	White lacquered steel plate
End Caps	Polycarbonate
Sealing Method	Silicon sealing with glue covered gasket

Performance & Ratings

Impact Resistance
IK08

Installation & Features

Connection Type	Easy connection for group-serial connecting
-----------------	---

Application

Suitable Environments	Parking Garages, Warehouses, Industrial Facilities, Commercial Settings, Outdoor Applications
