Product Overview

Durable Waterproof Connectivity

Designed for reliable power distribution, this waterproof switch and socket solution is engineered for durability in environments where moisture is a concern. Constructed with high-quality ABS materials, 62-class copper, and silver contacts, it ensures consistent electrical performance. Ideal for both residential and commercial installations, it provides essential protection against environmental hazards.

Technical Specifications

Operational Lifespan

40000 cycles
Switch Life

5000 cycles
Socket Life

Ingress Protection Rating

IP54

Construction Materials

ABS Plastic, 62-Class Copper, Silver Contact

Logistics

Packaging Details

- Colorful OPP bag
- Colorful retail box
